

Zipline Bucketless Mopping System

Innovative Textile Cleaning Products and Programs

• Push-button flow control applies solution only when needed. Locks open for large-area cleaning.

• Also available with trigger flow control.

Here's a self-contained system for routine maintenance of hard floors ... no bucket, no wringer, no problem!

The Zipline Bucketless Mopping System makes short work of office lobbies, kitchens, restrooms and other hard-floor sections within carpeted areas. With a large 52 oz. solution tank, its aggressive microfiber cleaning head, and the ability to convert instantly from dust mopping to wet mopping, the Zipline Bucketless System is as versatile as it is easy to use.

Zipline heads can be attached and removed in seconds with no ties or snaps to deal with. And with the Zipline Bucketless System, you're always cleaning with fresh solution instead of simply redistributing dirt and grime.

The Zipline tool weighs in at an easy-to-carry seven pounds with full solution tank. That's comparable to a blended 32 oz. looped-end mop and handle after having been wrung-out, making it perfect for remote-area cleaning or moving up and down stairs.

• Large tank opening makes filling easy.

• Rugged construction with six-month guarantee on solution dispensing mechanism.

• Generous 52 oz. solution tank with filter means less time refilling—cleans up to 7,000 square feet per tank! *Exclusive!*

• Translucent tank keeps solution level visible. *Exclusive!*

• Anti-clogging filter for consistent solution delivery. *Exclusive!*

• Full-width dispensing spreads solution evenly as you go. *Exclusive!*
